World Wrestling Entertainment, Inc., a billion dollar company, and a leader in global sports entertainment, seeks a Broadcast Engineering Project Manager to join our team.

Apply on-line at the bottom of the listing.

<http://bit.ly/aYRfi7>

I am currently seeking a position in broadcast operations and transmission within the Greater New York area. I have until recently been working at ABC, where I held the position of network technical manager. During my years in that position I was instrumental in the successful execution of a number of live events including "Dancing with the Stars", "The Academy Awards" and many important live Sports broadcasts. I have also been closely involved with ABC's transition from SD to HD broadcast operations and transmission. I have proven leadership skills and can motivate union and non-union staff in an effective and productive way. My performance has demonstrated a solid work ethic and ability to function well independently and as a member of a team.
